Dashboard 1 – Patient Admissions Overview

Provides an overall view of admissions, average patient age, male and female patient counts, and admission patterns by gender, age group, admission type and medical condition. Gender, Hospital, Admission Type and Date of Admission slicers are included on the left side of this same dashboard page to filter the visuals interactively.

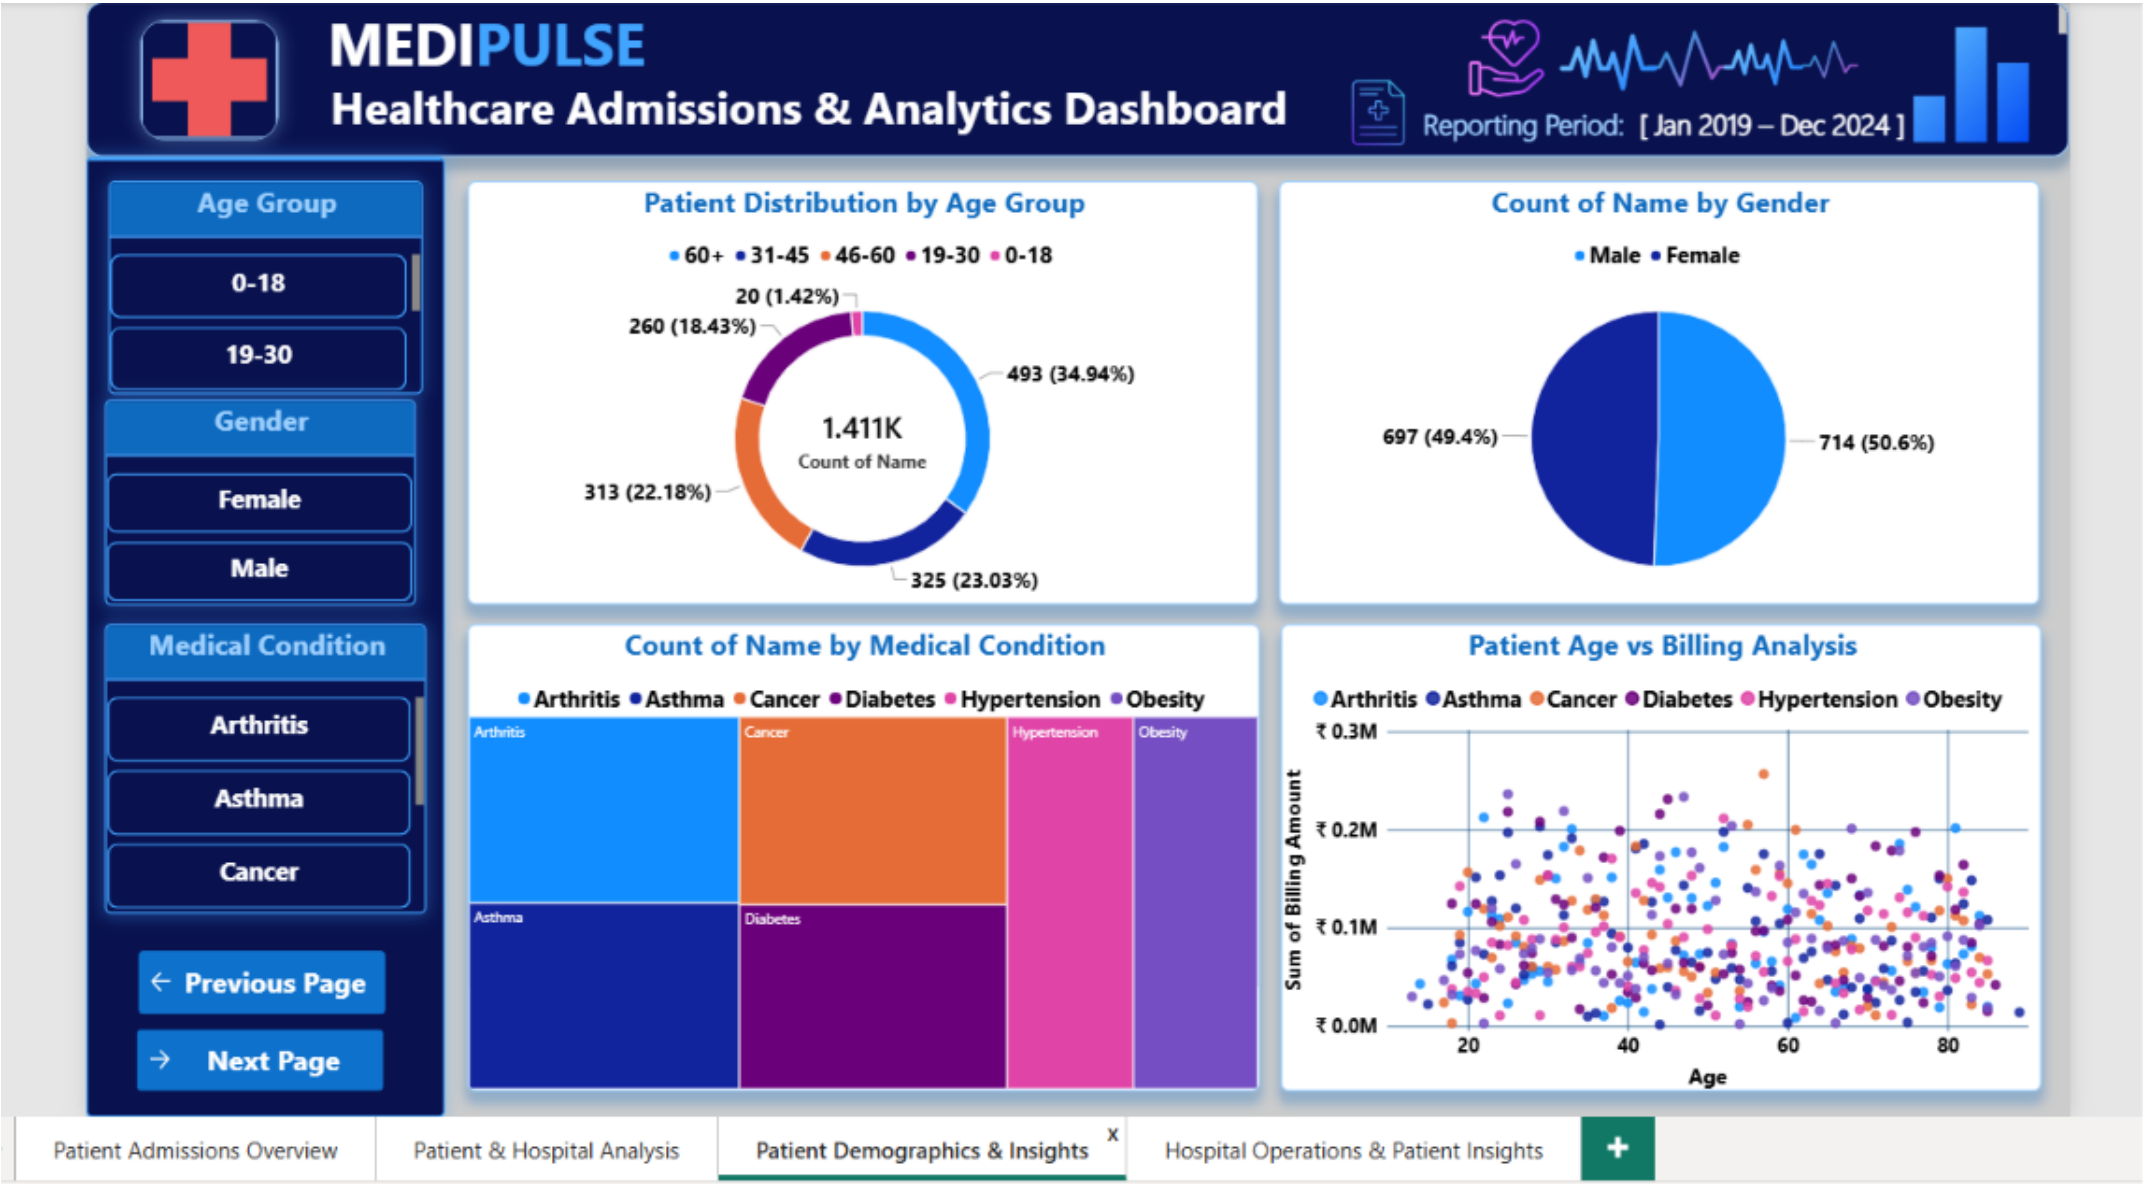

Dashboard 2 – Patient & Hospital Analysis

Focuses on hospital billing performance, showing total and average billing amounts, billing by insurance provider, admission type and medical condition, and the top 10 hospitals by billing amount. Related slicers are included on this dashboard page.

Dashboard 3 – Patient Demographics & Insights

Explores patient demographics through age-group distribution, gender counts and medical-condition counts, alongside a comparison of patient age and billing amount. Related slicers are included on this dashboard page.

Dashboard 4 – Hospital Operations & Patient Insights

Presents hospital-level admissions and patient metrics, including total admissions, total hospitals, average patient age, admissions versus target, hospital-wise admissions distribution and average patient age by hospital. Related slicers are included on this dashboard page.
